**Exodigo Acquires V&A, Inc.**

Natick, MA (July 8, 2026) – Exodigo, a leading subsurface intelligence and AI-engineering company, has acquired V&A, Inc., a Southern California-based civil engineering consulting firm. The deal brings together two highly complementary organizations, combining deep engineering expertise with cutting-edge AI-powered infrastructure solutions.

For more than 18 years, V&A has been a trusted partner to some of California's most prominent infrastructure owners, delivering utility and traffic engineering services across transportation, aviation, water, energy, and infrastructure sectors. V&A will continue operating under its established brand as V&A, Inc., powered by Exodigo, with its leadership team remaining in place and current projects and client engagements continuing uninterrupted.

"V&A has built an exceptional business grounded in civil engineering excellence, trusted client relationships, and a commitment to delivering large, complex infrastructure projects on schedule and on budget," said Jeremy Suard, CEO and Co-Founder of Exodigo. "Together, we are bringing engineering expertise and AI-powered subsurface intelligence closer together, helping clients make smarter decisions and deliver projects with greater certainty."

"As engineers, our mission has always been to deliver practical, high-quality, value-engineering solutions that help our clients succeed," said Jose Valle, Founder and CEO of V&A. "Joining Exodigo allows us to bring more powerful tools, driven by AI, to bear on the engineering problems our clients care about most, and to do so without changing what has always set us apart."

Morrissey Goodale, a specialized management consulting and research firm exclusively serving the architecture, engineering, and environmental consulting industries, advised Exodigo in the transaction.
